

I think the proposed changes to the "No Call" law are terrible and provide the consumer with no protection from telemarketers.

If the proposed changes are to take effect, than there is no point of having a "No Call" list or law. Millions of consumers will once again be subjected to continuous harassment in their homes from businesses all thanks to the FCC. The proposed changes will only benefit big business. It appears that the Federal Government is only interested in appeasing big business and has no consideration for the consumer.

THE FEDERAL NO CALL LAW SHOULD NOT BE CHANGED!!!
